CORN BONG. BY JOHN G. WHITTIER,

Heap high the farmer's wintry hourd; Heap high the golden earn; No richer gift has Autumn poured From out her lavish horn. Let other lands, exolling, glean The apple from the pine, The orange from its glassy green, The cluster from the vine,

We better love the bardy gift Our inged vales bestow, 'o cheer us when the storm shall drift Our harvest fields with snow, Through vales of grass and flowers On piaws their furrows unde, While, on the hills, the sun and shows The changeful April played.

We dropped the seed ofer hill and plat Remealt the sap of May, And frightened from our spronting grad The robberserows away. All through the long bright days of Jun-Its leaves grew green and fibr_i And waved in hot raid-summer moon Its soft and yellow hair.

He harvest time is come; We plack away its frosty longes, And bear its freatures home. Then, richer than the lighted gifts Apollo showered of old. Pair hands the broken grains shall sift And kneed the meat of gold. Let yapid idlers loll in silk Around the coeffy heard; Give us the bowl of samp and milk By homespun hearty poured,

And now with Automa's moonlit eyes,

Then shame on all the proud and vain Whose folly laughs to scorn The blessings of our hardy grain--Our wealth of golden corn Let earth withhold bergoodly root:

Let mildew blight the rec-live to the worm the orehard's mult, And whent fields to the fly. But let the good old grop ndorn. The bills our faths is trul; Still let us, for His goldencorn, Send up nor thanks to (fod).

Let mildew blight the

FRIDAY, OCTOBER 20, 1871. THE FARM AND HOUSE,

Without elaborating the many strong he prominent benefits may be briefly stated, as follows: 1st. August and September is a good time to turn over bound soil land, and manure and re-seed it at once to grass, obtaining a crop of hay the following year.

cellent Lime to break up sod land for planting the following spring. The weather is then cool and bracing, and the team strong and heart for the work, while the weather in the oring is more relaxing and the team less tible; and the spring work being always Immying, it saves time to disputch as much of the plowing as possible dur-

bles into fine particles in the spring, and

5th, Most kinds of meets are either mg, especially the common white grub

7th. Corn stubble land may be plowed

may be at once resorted to with decided advantage. Where the subsoil is poorer, the plowing may still be advantageonsly deepened by degrees, say an meliat each new breaking. But in by far s majority of cases, deep plowing may be practised at once-indeed it may be the rule with safety, while shallow plouing may be the exception. Plow my nine. ten, eleven or (welve inches in November. The subsoil turned up will grow several shades darker by spring. The asset and atmospheric influence of winter will mellow the soil. Inorganic elements and all the latent fertility will be more active for benefitting the crop. In the spring spread the mannie, and plow it in, or otherwise work it in or numgle it with the soil to the depth say of four inches, or a little more or less and you have the very best attainable condition for realizing good crops Deeper plowing may thus be practised

UNDERDRAINING. 15 it it is capable of doing.

made, and the result astonishes, in Land with a tenacious subsoil is gen-

soil being wet and cold, vegetation grows very imperfectly, and in many

the soil becomes dry and tillable in the cultivation in all ordinary crops at a earlier period, the temperature is indrouth are but slightly felt, on account of the lacerated condition of the sail the sail the analyse continue out to puss safe through the drains, and the general new many marketines or repussing tion of the dews and light rains. It should be remembered that when

can be done now, as well as in the spring, and it will save much time when the early spring work is pressing. When trees are set in the fall they should have a good mulch. It is a common impression that stone fruits should not be set in the fall. However this may be in colder localities, we find that it in the great peach districts of Delaware and Maryland they set in the fall or spring, as most convenient.

SHADE TREES,-Plant shade trees, except evergreens, as soon as the leaves fall; if done carefully they will hardly feel the effects of their removal.

feel the effects of their removal.

A NEW bird-cape is in vogue. It is made of wood, such as rustic chairs in parks, and is so ingeniously covered with leaves and thowers growing in the earth at the bottom as to wholly hide strengths to make the induced in the rustic chairs in parks, and is so ingeniously covered with leaves and thowers growing in the earth at the bottom as to wholly hide strengths to induce you for the kenty country of the rustice of the wood and wire. The birds seem CHAS. M. EVANS, Proprietor. within a little bower of natural flowers.

A STUPID exquisite, at a wedding, wished the bride "many happy returns gives, source

ADVANTAGES OF FALL PLOWING. points in favor of fall plowing, a few of To those with brokendows Constitution

2d. October and November is an ex-

ing the previous adams.

(th. Sod find broken up early in an tumn will be quite free from growing grass the following spring; the roots of the late overturned sod being so generally killed by the homediate succeeding start in spring. 5th. The trests of winter disintegrate the plowed land, so that it readily erum-

a deep mellow seed bed is easily made. The chemical changes and modifications resulting from atmospheric action during winter develop latent fertility in the upturned furrows, which together with mellowing influences materially focusaswholly destroyed, or their depredations are materially checked by late fall plow-

very early sowing in the spring, thereterv early sowing in the spring, theretore going far to insure a good catch of
grass, the roots of the new seeding getting hold well or be well established betore the drouths of summer come on.

Sth. Most land needs deeper plowing
than has generally been practised.
When the subsoil is fine grained, and
metuous and close, or where there is a
hard pain of good quality, deep plowing
may be at once resorted to with decided

than would at all times be safe and expedient, if the plowing is delayed full In this country the subject of underdraining has not generally been well studied. In a new country, soursely filed, with a virgin soil, enough is produced to meet the wants of all, without resorting to any extra labor and outlay to make the earth produce all

ait when the price of land advances, the soil becomes exhausted, and the population greatly increased, it becomes supreme that of Penns Ivania. Supreme that of Penns Ivania. The condit of Penns Ivania. The condition of Penns Ivania. T many gases, even those who are the main operators in the enterprise. UnSupreme Court of Denrichants.

But the least operators in the enterprise. UnSupreme Court of Denrichants.

But the least operators from 1 1888 destraining, deep plowing and high

manuring are imparatively denamined at the bands of the cultivator, who pays tion lifty to one bundled dollars per

grows very imperfectly, and in many cases does not pay the expense of cultivation. But the cost of the land and ble expense of tillage are nearly or quite as much as they would be on good seil.

Being in possession of such land, the question arises, how can it be improved so as to make it produce renumerative crops? The straight forward answer to this question is, by underdraining. I land is in a condition to require under draming it will always yield enough more to pay a handsome profit on the

outlay, whatever that may be, provided it is within the range of a judicious By a good system of underdraining, proper season, and is better fitted for creased by the absonce of surplus water, and the usual effects of severe Are the medicines you require to parify the food excite the torpal blyer to healthy ac of the lacerated condition of the sail

ever the earth is dry, the atmosphere ontains larger amounts of moisture than when the earth is moist. During drouth, water is not out of existence The quantity is fully as great now as at the time of Noah's flood; the earth and air are the only places to make the draining perfect; and when not found in the one we shall always be able to obtain it in the other,—N-though Agricul-PLANTING of all kinds of fruit free
